

## Buy American Act Verification

### For Products Manufactured and Supplied by The Viking Corporation

The Viking Corporation verifies that each product listed in Attachment A is a domestically manufactured product under the Buy American Act provisions of the Federal Acquisition Regulation, 48 C.F.R. § 52.225-1, "Buy American—Supplies." (hereinafter "BAA Clause"). More specifically, to the extent a product listed in Attachment A is offered as an end product in a federal procurement, it is a "domestic end product" under the terms of the BAA Clause.

The Viking Corporation analyzed the products listed at Attachment A based on the following terms of the BAA Clause:

- *Non-iron or steel end products.* A manufactured end product not consisting wholly or predominantly of iron or steel (or a combination of both) qualifies as domestic if (1) it is manufactured in the United States and (2) at least 55 percent of the cost of all components are mined, produced, or manufactured in the United States. The second element of this test is waived for commercially available off-the-shelf items.
- *Iron or steel end products.* A manufactured end product consisting wholly or predominantly of iron or steel (or a combination of both) qualifies as domestic if (1) it is manufactured in the United States and (2) the cost of foreign iron or steel is less than five percent of the cost of all components.

The following terms are defined at 48 C.F.R. § 52.225-1: "commercially available off-the-shelf item," "cost of all components," "domestic end product," "end product," "foreign iron and steel," "predominantly of iron or steel or a combination of both," and "produced in the United States."
